I'll start with the premise since some of you may not have been involved in the earlier discussions. I'm in 22 January 2029. I'm using an Information Transcension Adapter (ITA - developed in 2028 - that allows me to connect with previous internet histories. This is a quantum computing technology. Each ITA is "set" for a specific period prior to use. This current ITA is set for exactly for 2,975 days prior. But our unit (Space Force) has other ones that are set for different times.
